- ITEM 5:** **Site Development Permit SDP03-23M and Variance V03-07 to allow construction of a new 2,925 square foot single-family residence, with two decks and a loggia and with Variances related to structural height, front yard structural setback, and rear yard structural setback for property located at 34111 Street of the Blue Lantern.** *(Continued from the regular Planning Commission meeting of August 6, 2003) (FF# 0600-30/SDP03-23M/V03-07/Blue Lantern, 34111) [AA]*

Applicant: John P. McCloskey, Architect
Owner: James DeCarli
Location: 34111 Street of the Blue Lantern

Request: A proposal to construct a new single-family residence with a habitable area of 2,932 square feet that includes a terrace and two decks occupying 438 square feet, and a basement containing a two-car garage, mechanical and conditioned space and a storage room occupying a total 1,715 square feet, on a steeply sloping 3,887 square foot lot, with variances to permit a 36.4-foot structural height (a dimension 10.4 feet in excess of the City standard), to permit a front yard setback of 15 feet (a distance 1 foot less than the City standard for shallow lots), a rear yard structural setback of 10 feet (a distance 6 feet less than the City standard for shallow lots), and a reduced stepped back distance and extension (3 feet for the second story over approximately 40% of the width of the structure and 6 feet for the third story over approximately 40% of the width of the second story of the structure) for each floor above the first floor of the structure from the floor below.

Environmental: The proposed project qualifies as a Categorical Exemption (Class 3 - Section 15303 – New Construction or Conversion of Small Structures) from provisions of the California Environmental Quality Act (CEQA) because it consists of construction of one single-family structure.

Recommendation: Staff recommends the Planning Commission adopt the attached draft Resolution denying Site Development Permit SDP03-23M and Variance V03-07. The size and mass of the proposed residential structure are excessive for the proposed project site, particularly in light of the four variances requested, in spite of dimensional and topographical constraints of the site.
